Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on July 8, 2005 has been entered.

Status of Claims

This communication is in response to amendment filed on July 8, 2005.

- Claim 10 was deleted in the amendment filed December 27, 2004.
- Claims 1, 16 and 25 have been currently amended.
- Thus, Claims 1-9 and 11-28 remain pending.

Response to Arguments

Applicant's arguments with respect to the above referenced claims have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-5, 7-9, 11-23 and 25-27 are rejected under 35 U.S.C. 102(e) as being anticipated by Blagg (US 2003/0120571 A1).

As per the following claims, Blagg discloses:

1. A system for the payment of petty cash disbursements comprising:

- one or more master purchasing card accounts linked to a bank account (¶0055-0056, 0069, 0072, linking accounts; ¶0062, issuer is typically a financial institution or bank); and
- one or more subordinate purchasing card accounts linked to one of said master purchasing card accounts or to other subordinate purchasing card accounts linked, directly or indirectly, to one of said master purchasing card accounts (¶0071-0075, 0090-0094, dependent linked accounts); wherein the owner of said bank account may authorize the transfer of funds to any master purchasing card account to cover purchases made using that master purchasing card account or any subordinate purchasing card account linked to that master purchasing card account (¶0075-0078, 0104, 0126); and wherein the owner of any of said purchasing card accounts may authorize the movement of funds from its own account to any subordinate purchasing card account having a link thereto (¶0134-0142, authorizing a transaction; 0143-0154, applying a payment).

2. The system of claim 1 wherein each of said purchasing cards has an expenditure limit (¶0016).

3. The system of claim 1 wherein any of said purchasing cards may create and break links to or from subordinate purchasing cards (¶0080, 0085, de-linked account).

Art Unit: 3621

4. The system of claim 2 wherein requests for the modification of the said expenditure limit for any subordinate card and the authorization of said modification can be accomplished in real time (§0136).

5. The system of claim 4 wherein said requests and said authorizations are facilitated by a web site available over the Internet (§0059-0062).

7. The system of claim 2 further comprising a software application running on a computer system (§0058-0059).

8. The system of claim 7 wherein said software application may establish communications with outside entities (§0058-0059).

9. The system of claim 8 wherein said communications with outside entities are: encrypted prior to sending and decrypted after receiving to ensure data integrity and security; and entered into a log file for audit and customer support purposes (fig 7B, 754-760, authorization and approval).

11. The system of claim 9 wherein said software application establishes communication with a bank, said bank maintaining said bank account (§0062, 0063).

12. The system of claim 11 wherein said software application initiates a transaction at said bank to move funds between said bank account and said purchasing cards to cover expenditures made

Art Unit: 3621

using said purchasing cards (§0016, 0035, 0104, 0126).

13. The system of claim 9 wherein said software application establishes communications with a credit card processor (§0058).

14. The system of claim 13 wherein said software application can instruct said credit card processor to modify said expenditure limit for any of said purchasing cards (§0062, 0121, 0136, 0153, 0181).

15. The system of claim 13 wherein said credit card processor exchanges data with said software application, said exchange data advising said software application of purchases made using any of said purchasing cards (§0129-0131, data exchanged/updated).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 6, 24 and 28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Blagg (US 2003/0120571 A1), in view of Madan et al., U.S. Patent 6,581,035 B1.

Blagg discloses a system/method/computerized system wherein one or more master purchasing card accounts linked to a bank account (§0055-0056, 0069, 0072, linking accounts; §0062, issuer is typically a financial institution or bank); and one or more subordinate purchasing

Art Unit: 3621

card accounts linked to one of said master purchasing card accounts or to other subordinate purchasing card accounts linked, directly or indirectly, to one of said master purchasing card accounts (§0071-0075, 0090-0094, dependent linked accounts); wherein the owner of said bank account may authorize the transfer of funds to any master purchasing card account to cover purchases made using that master purchasing card account or any subordinate purchasing card account linked to that master purchasing card account (§0075-0078, 0104, 0126); and wherein the owner of any of said purchasing card accounts may authorize the movement of funds from its own account to any subordinate purchasing card account having a link thereto (§0134-0142, authorizing a transaction; 0143-0154, applying a payment).

Blagg does not explicitly disclose the use of voice recognition software and technology to accomplish such transactions.

Madan et al., however, teaches a system and method for voice-enabled transactions wherein user instructions, commands and ultimately transactions can be accomplished utilizing the user's voice (see abstract; figure 2 and associated text). It would have been obvious to one of ordinary skill in the art at the time of the invention to modify Blaggs' system and method for performing financial transactions to utilize Madan's voice-recognition mechanism to provide another method of identity verification and authentication so as to provide an additional means to prevent fraud, especially with regards to financial transactions, as per teachings of Madan et al.

Claims 16-27, 29 and 30 are directed to a system and method as recited above and are similarly rejected.

Although the Examiner has pointed out particular references contained in the prior art(s) of record in the body of this action, the specified citations are merely representative of the teachings in the art as applied to the specific limitations within the individual claim. Since other passages and figures may apply to the claimed invention as well, it is respectfully requested that the applicant, in preparing the response, to consider fully the entire references as potentially teaching all or part of the claimed invention, as well as the context of the passage as taught by the prior arts or disclosed by the examiner.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:
